"Unthinking respect for authority is the greatest threat to truth."

Einstein

This newsletter is free. You may freely forward it to as many people as you like.

To get your own copy, please send me your email address via text. The number is **408 389 1958**

Neither your email nor your phone will be shared or sold. To anyone. Ever.

The newsletter will contain stories that may be of interest to you. It may also contain comments on the story. If you wish to make your own comments, send them to **newsletter@rstannard.com**

I have no problem with vigorous background checks when it comes to firearms. While we're at it, let's do the same when it comes to immigration, voter I.D., and candidates running for office.

## The battle is well and truly joined

Over the last few issues, I have shared exactly how we could take back our country. Please understand – I am not claiming authorship of the game plan. But when I saw it start to unfold in various locations across our great land, I knew it was the proper path for right-thinking citizens to follow.

This path begins with our remembering that it was – and is – the various states that founded the federal government. Not the other way around. Washington DC exists to simplify those tasks that were perhaps beyond the ability of the various states to efficiently shoulder. An example would be defense. Another may be the postal service, though that has turned out to be an example of how big government can screw things up.

Once we realize that the states run this country, we can free ourselves from the witch's spell that people like Nancy Pelosi have been casting for a very long time. We can put the federal government back in its place, a mere servant to the states, and to the citizens who built this great land.

Here are some of the areas in which the battle is happening.

- **Transgender Sports**. The left wants to allow biological men to compete in women's sports. A number of states have, or are in the process of, passing their own laws stopping this travesty.
- **HR1**. This contentious law wants to stop state's constitutional rights to run elections in the way they see fit. HR1 will legalize all the methods the left used to steal the last election. Don't read this with a weak stomach.
- **PRO Act**. Biden's Protecting the Right to Organize act is much more than an attempt to force all workers to be in unions. It also seeks to stop our right to work as a casual worker. All work will be W2, not 1099. This can kill 57 million jobs.
- **Big Tech Censorship**. Texas is leading the charge (and Australia, too) to prevent censorship of Texan's access to free speech. Big Tech has become too powerful to control.

*The American is not related in any way, to any political party. The editor is not a member of any political party. We seek only the truth, regardless of who it helps – or hurts. You can reach us at **newsletter@rstannard.com***

**Being free of doubt means we have stopped asking the important questions. This is a terrible way to live one's life. Voltaire said that "Doubt is a difficult position. But certainty is absurd."**

#### **Where to get knowledge**

1. Newsmax.com
2. Oann.com
3. ConventionOfStates.com
4. WesternJournal.com
5. Solari.com
6. TheEpochTimes.com
7. Brighteon.com
8. Conservative.org

#### **Humor is the best medicine**

Eric Swalwell has been appointed to the House Intelligence Committee, despite having an affair with Fang Fang, a beautiful female Chinese spy.

Kevin McCarthy will be introducing a resolution to remove Swalwell from the committee.

Ted Cruz said "To be fair, Eric HAS done a lot of undercover work on Chinese Communists!"

Beautiful. Swalwell screams about Trump and Russia, while he is in bed – literally – with China.

#### **FedCoin**

If you do not know this term, you need to learn it. Quickly. One of Trump's Executive Orders was to have the US Treasury look into CryptoCurrencies. Many countries are seriously looking. China will move to a full Crypto Economy next year.

Because we would no longer need to print currency, or mint coins, we could save a lot of money. We would no longer need the US Mint.

But from here it only can get worse. The Chinese have a system they call Social Justice. The amounts of credit a citizen can earn, and how they can spend the credits they have all depend on their doing exactly what the CCP wants them to do. If they don't act as requested, they may not be able to buy a car. Or rent an apartment. Or travel. Or go to universities.

I can assure you that our leaders here are watching exactly how the Chinese get their own population to behave in prescribed ways. There is no reason to believe that they won't hesitate to mimic the Chinese Communist Party.

#### **Reparations 'r Us**

Evanston IL city council is trying to create their own brand of reparations to repay blacks who were disadvantaged in buying a house in their city. Not many people are still alive who were victims of redlining, a practice made illegal long ago. So the city elders have extended the offer to anyone whose parents and/or grandparents were affected. Payments of \$25,000 to each person so affected can total over \$300m, to be paid for by a tax on marijuana. That's either a very steep tax, or the residents use a lot of weed.

But, the black residents have decided that the \$25,000 isn't nearly enough. They also want all blacks to be assumed to have been adversely effected. Even those who just moved to Evanston. I don't think this is going to have a happy ending, but if that is what the citizens of Evanston agree, good for them. It will be interesting to see where this effort ends.

Biden has called the climate a National Security Threat, and has forced the military to spend money to address it. This may not be a bad thing. China is the world's worst polluter. Let's sick our military on them.

And a final thought from Franklin Delano Roosevelt:

**We, and all others who believe in freedom as deeply as we do, would rather die on our feet than live on our knees.**
