Exactly Where Are We Going?

Before I get started, let me introduce you to my new term: **PCSD**. The gang of four that lives on the left side of politics have blended to where they are all one group, and I have named that group **PCSD**, not unlike PTSD, which used to be called shell-shock. **PCSD** is **P**rogressives, **C**ommunists, **S**ocialists and **D**emocrats. It is just a whole lot easier to say. And if you are a moderate Democrat reading this, and you object to being grouped with the others – you should wake up and smell the outhouse. You identify as a Democrat, but your party has changed, and moved far to the left. And as long as you admit to being a Democrat, you are now a part of the problem. You are exactly the same as a Communist, because you now vote as the Communists vote.

What the heck is the PCSD trying to accomplish? If you watch the talking heads and leaders of the Conservative side of things, they are confused by the actions of the PCSD. Our leaders decry that the PCSD is 'leading us to destruction'. Our leaders attribute this to the stupidity of the PCSD.

While it is true that one's opponent will occasionally act stupidly, over the long haul, one would go broke attributing everything your opponent does to mere stupidity. We will be far better off to assume that the moves our opponents make (that we see as stupid) are really a form of evil genius.

The PCSD are, in fact, trying to destroy the United States of America. They are opening our borders – first the southern one – and now the Afghan one. What? You didn't know we had a border with Afghanistan? We don't. But we just let in thousands of Afghans without bothering to find out who we were letting in. Don't you think the Taliban, who was in complete control of who was let in to the airport, put plenty of Islamic Jihadists on the planes coming to the US?

The PCSD is destroying our economy, our military, our education system. They control the media, Hollywood and Corporate America. Sports have bowed. They are destroying the foundational systems upon which the US runs. Defund police.

This issue we are purloining from [Hillsdale College](#) again. Their [Imprimis](#) collection of speeches are thought provoking reads.

This issue, the topic is:

[Facing Up To The Threat of China](#)

By Brian Kennedy, President of the [American Strategy Group](#).

This is a critically important read for every American citizen. China has woven itself deeply into the fabric of our lives, with an intent that we need to be aware of, and to understand its impact on our lives.

De-platform any thought that disagrees with them. Prevent those who do not meekly fall in line from working, from shopping for food, or even from getting in the car and driving where they want. All of these things are either in place, or are in the planning stages. Heck, even the National Archives thinks that both our Constitution and our Declaration of Independence contain harmful words. And that the beautiful architecture in our Capital is an example of racism.

So where is the PCSD going with all this? We will be wise to attribute all these attacks on everything American, not as some stupid mistake, but exactly as they are: the intent to form a new government. One built not on equality, but on equity, which is a completely different kettle of fish. And what of those who do not agree with them? They will be crushed. Unable to work. Unable to travel. Unable to do use the health care system. And lots of other punishments for 'wrong-think'.

If they can make the vaccine mandates stand up through the legal challenges that will be coming, the next step is that they will feel empowered to force acquiesce to anything their pointy little brains can think up. PCSD has already begun implementing their punishments. And we will have no recourse

No recourse except splitting the country into two separate countries. The Declaration of Independence begins "When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another...". We are now at that point again.

Our country is now in the process of splitting itself in two. The question is no longer "Should we make it happen?" Rather, the real question is "How can we stop it from happening?" The battle is occurring on fronts all across America. Most publicly notable is the fight between the federal government, as it now stands, and the Red States. The topics are unimportant: virus, taxes, abortion, guns... The real argument is over the power that the federal government is assuming over the states.

The 10th Amendment says "The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people." The federal government has been ignoring the 10th Amendment for a very long time, illegally usurping the powers of the states to itself.

And now the states are fighting back. There is only one logical conclusion to this disagreement. Separation into two countries. (To be continued in the next issue).

And a final thought from Alexandria Ocasio-Cortez:

"Owning guns is not a right. If it were a right, it would be in the Constitution."
